

LINO

designed by nature

WHAT IS TARKETT'S LINO?

AN UNCHANGED RECIPE SINCE 1898

94%
natural raw materials

Linseed oil: flax is the starting point. The crop's seeds are dried and pressed to yield linseed oil.

Pine rosin: added to the linseed oil, it creates the binding agent, called linoleum cement.

Wood flour: lends the mixture lightness and durability.

Cork dust: keeps it strong and flexible.

Calcium carbonate: a natural filler, to bring stability.

Pigments: for the rich colours!

and jute: the base of this most sustainable flooring material.

A VERSATILE MATERIAL

Robust

Resistant to abrasion, stains and chemicals

Acoustic

Up to 18dB sound insulation

Sustainable

Our xf²TM: surface treatment means an excellent resistance, a reduced life cycle cost, and a minimized impact on the environment

Water usage*

Electricity*

Detergent*

* Compared to linoleum without xf²TM

A unique offer on the market

Originale

- The first 100% natural linoleum, Cradle to Cradle Gold certifiedTM

LinoWall xf²TM!

- The only linoleum approved for use on walls and featuring Bs2-d0 fire certification
