

RE— VIVE

NATUZZI

AT NATUZZI WE
DREAM OF A MORE
COMFORTABLE WORLD.
CALL IT OUR PASSION TO
MAKE YOU FEEL BETTER.
A CHAIR JUST DOESN'T
SIT THERE; IT HAS A
PRESENCE THAT SAYS
SOMETHING ABOUT YOU.
THE RE-VIVE CHAIR IS
DESIGNED TO MOVE
WITH YOU, AND FOR
YOU TO BE MOVED.

A handwritten signature in black ink, reading "Pasquale Natuzzi". The signature is fluid and cursive, with a large, stylized initial "P" at the beginning.

MR. PASQUALE NATUZZI

Chairman and Chief Designer
Natuzzi Group

A
NEW
MOVEMENT
IN
COMFORT

RE-CLINE

We don't sit still even when we are relaxing. We move from one activity to the next, between states of work and play, we even move when we are at rest. Traditional recliners are operated with lever mechanisms. We set out to change that - to design a recliner that would offer complete support as well as intuitively respond to

movement, to deliver a new kind of comfort. Re-vive moves as you move. It flexes as you change position, responding to what you do naturally. Its unique technology provides a seamless transition between positions, removing the stress and strain of manual adjustment as well as providing a gentle dynamic rocking action.

RE-LAX

Taking time to reflect, relax and recharge is essential. Our goal was to develop a recliner that promoted health and well being through total support and unparalleled comfort. Relaxation is physical as well as mental. Part of the process is the transition from standing to sitting, to reclining.

We set out to make this process as fluid and as comfortable as possible. Re-vive creates physical pause. It delivers ergonomic support in seated as well as partial and full recline positions. Elongating the body horizontally assists blood and oxygen flow to encourage total relaxation and aid recovery.

RE-VIVE

If support and comfort are essential, so too is form, finish and timeless design. Where you choose to relax is personal. We have developed a unique support technology presented in different ways to match different design styles.

Re-vive is tailored to individual fit and finish preferences. Re-vive is available in three different leather upholstery styles, two sizes and multiple color options. Re-vive is designed to compliment your favorite place to relax.

TWO SIZES
THREE STYLES
MANY
COLORS

STEP 1: CHOOSE A SIZE

QUEEN

KING

THE CHAIR COMES IN TWO SIZES
TO FIT ALL SHAPES AND WEIGHTS

Re-vive comes in Queen or King size and is designed to position you perfectly in full recline for optimal breathing with open chest and relaxed diaphragm. Your feet are elevated for best circulation and relaxation and your head is comfortably supported at all times.

STEP 2: CHOOSE A STYLE

QUILTED

TAILORED

LINEAR

RE-VIVE COMES IN THREE MODELS

The Re-vive recliner comes in three different styles designed by Natuzzi in Italy and crafted in quality leather, with tailored features such as the arm detailing. This Re-vive recliner is built to last like all Natuzzi leather products and has been put through over 200 individual component tests for quality. It comes with a 5 year warranty on the mechanism and a 2 year warranty on the leather covering.

STEP 3:
CHOOSE A BASE FINISH

MATT WHITE

MATT BLACK

MATT BROWN

STEP 4: CHOOSE A COLOR

SUMMER WHITE

PEARL GREY

PEARL BLUE

PEARL FOG

EVERGREEN

PITCH BLACK

PEARL GOLD

MIDNIGHT BLUE

PEARL TAUPE

DEEP BROWN

STEP 5:
ADD A SLIDING HEADREST
AND ROCK LOCK

FINE TUNING

For optimized comfort, Re-vive has an optional Sliding Headrest that adjusts to your individual preference and a Rock Lock mechanism to lock in the comfort. The final touch of luxury is the Tilting Ottoman that comes with every chair.

DESIGN FEATURES

① RESPONSIVE RECLINE

Recline without adjusting anything at all. Responsive Recline uses a specialty weight compensating mechanism that provides a natural reclining motion in perfect balance. Seamless transitions intuitively respond to your posture changes, letting you maintain maximum comfort in any position.

② FLUID MOTION

Support your body's subconscious movements. Experience weightlessness through a light rocking motion in both upright and recline positions to release the stresses of daily life.

③ LIVE BACK

Move without restrictions. Live Back mimics your body, encouraging both micro and macro movement and assisting blood and oxygen flow. Live Back comprises three different flex movements - twist, lumbar and recline flex that work in unison to deliver fluid natural motion.

④ HIGH DENSITY CORE

Spread the load. A High Density Core structure provides strong, dynamic support by naturally spreading weight evenly for ultimate comfort.

⑤ COMFORT CUSHION

A compliant layer of cushion forms naturally to the contours of your body, supporting you as you relax into the chair.

⑥ DYNAMIC ARMS

Hold your position. Dynamic Arms feature live motion that mimics your movement in any position, sliding gently with you as you change between upright and recline, while providing constant support.

⑦ ROCK LOCK (OPTIONAL)

Lock the motion. At certain times and for certain tasks you may want to lock out the motion - with the squeeze of a lever you can lock the rock at the angle you choose.

⑧ SLIDING HEADREST (OPTIONAL)

Rest easy. The Sliding Headrest offers seamless adjustment through a simple sliding action to suit your posture and preferred support position.

⑨ SWIVEL BASE

Access from any angle. The low profile Swivel Base lets you get on and off the recliner easily, across a full 360-degree movement.

⑩ TILTING OTTOMAN

Elevate and extend. The Tilting Ottoman is designed to follow your body's lead, tilting to your leg and foot angle effortlessly and providing responsive support while aiding circulation.

ALL COMPONENTS OF THE RE-VIVE RECLINER HAVE BEEN CAREFULLY CONSIDERED TO ENSURE MAXIMUM QUALITY.

UNIQUE INNOVATION

The Re-vive recliner combines a series of patents and design registrations (pending) to deliver a new movement in comfort.

ECO-FRIENDLY

The Re-vive recliner is not only sourced from recycled materials where possible, but has been designed to be highly recyclable at the end of life.

BUILT TO LAST

Re-vive is manufactured using a combination of durable materials and controlled manufacturing processes to deliver a robust long life product.

- Structural base (chair + ottoman)
 - High pressure diecast aluminium
- Major components
 - Injection moulded flexing polymer
- Mechanism
 - Powder coated pressed steel
- Leather
 - 1.2mm, medium grain Protecta Leather
- Foam
 - Multi-density polyurethane.

STRONG & FLEXIBLE

For the ultimate combination of flexibility and strength, the spine is made from injection molded polymer composite, while the major shell components are made from injection molded, flexing polymer.

SMOOTH TURN

Smooth and seamless rotation is delivered from ground stainless steel bearing.

EASY SLIDE

For easy sliding without marking, the gliding feet are made from ultra smooth, molded polymer.

TOUGH COAT

Long life protection and reduced marking of the main mechanism comes with a smooth powder coat finish.

MINIMAL COMPONENTS

With only seven assemblies this chair is designed for minimal failure and easy replacement.
